DETAILED ACTION

Election/Restrictions

NOTE: Claims 13-32 provide for the use according to claim 1. However, the claims do not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced. Furthermore, the claimed invention outlined by claims 13-32 is directed to non-statutory subject matter. The claimed invention does not fall within at least one of the four categories of patent eligible subject matter recited in 35 U.S.C. 101 (process, machine, manufacture, or composition of matter). For the purposes of restriction, since claims 13-32 are dependent upon claim 1 which recites a process comprising using, claims 13-32 are being treated as if they also read on a process comprising using. Please note too, however, that "a process comprising using" is also indefinite as it is unclear if a method of treatment, a process for the preparation or some other process/method is intended to be sought for patent protection. Claims 1-12 do not set forth any steps to be followed in the claimed process. Examiner respectfully requests appropriate corrective action.

Species Election

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species listed below do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The special technical feature linking the genera is a composition for human consumption containing less than 1600 picomoles of polyamines to combat a syndrome or a pathology in which the NR2-B sub-unit of the N-methyl-D-aspartate receptor is involved. This element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art.

In the present case, Kergozien et al. ("Polyamine Deprivation Provokes an Antalgic Effect" Life Sciences 1996, 58(24), 2209-2215, as per Applicant's IDS) teaches a polyamine poor diet, namely a diet containing less than 10 ug/kg (see 3rd paragraph of Methods section page 2210). This diet is useful to treat pain. Pain, as stated in the instant specification and claims is a type of syndrome or a pathology in which the NR2-B sub-unit of the N-methyl-D-aspartate receptor. As a result, no special technical features exist among the claims because the inventions fail to make a contribution over the prior art.

The species are as follows:

Species of composition containing less than 1600 picomoles of polyamines and species of syndrome or pathology in which the NR2-B sub-unit of the N-methyl-D-aspartate receptor is involved.

Applicant is required, in reply to this action, to elect a single species of composition and syndrome to which the claims shall be restricted if no generic claim is finally held to be allowable. For the <u>composition</u>, applicant is required to elect the following:

a) the presence or absence of at least one inhibitor of intracellular synthesis of polyamine of claims 17-20. In the event that the presence of at least one inhibitor of intracellular synthesis of polyamine is elected, the specific type of inhibitor, for example that of claim 20, must also be elected,

- b) the presence or absence of at least one antibiotic, as in claim 21, and
- c) the presence or absence of vitamins as in claims 16 and 22.

For the <u>syndrome or pathology</u>, applicant is required to elect a specific syndrome or pathology of those recited in claims 2-12.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: claim 1.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Page 5

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Due to the complicated nature of the restriction, the restriction requirement is being made via written correspondence in lieu of a telephone interview.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kortney Klinkel whose telephone number is (571)270-5239. The examiner can normally be reached on Monday-Friday 8am to 5pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sharmila Landau can be reached at (571)272-0614. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a
